Trinity unveils new offerings to oil and gas industry

BY OUR BUSINESS BUREAU

DUBAI: Trinity Holdings, a leading provider of engineering solutions in the Middle East, showcased its new products and services for the upstream oil and gas industry at Abu Dhabi International Petroleum Exhibition and Conference (Adipec), held from Nov.11 to 14, 2012.

A key highlight of Trinity's showcase at Adipec was TRIBOX, a specialised heat treatment

process suitable for oil field components that operate for an extended period of time in corrosive environments.

The process, which is equivalent to quench, polish, quench (QPQ), provides corrosion resistance, hardness and a black finish, which retains a thin layer of oil on the surface of these components. Premium gas tight connections (VAGT) for both onshore and offshore applications and American Petroleum Institute (API)

licensed products were also among other products on display.

"Trinity is focused on extending its engineering portfolio to offer integrated solutions for diverse industry requirements. We are confident that by leveraging over three decades of local experience and partnering with global experts, Trinity will be able to address the challenges posed by the dynamic oil and gas industry," said Arif Sayani, Managing Director, Trinity Holdings.

The screenshot shows the Gulf Today website interface. At the top left is the logo for 'The Gulf Today' with a globe icon. To its right, it says 'Last updated 8 hours, 15 minutes ago'. A large banner across the top right of the page reads 'and get AED350 worth of vouchers from'. Below the banner is a navigation menu with categories: HOME, LOCAL, MIDEAST, ASIA, WORLD, BUSINESS (highlighted), SPORT, OPINION, WRITERS. Underneath the menu are sub-categories: Local | Regional | International | Viewpoint. The main article title is 'Trinity unveils new offerings to oil and gas industry'. Below the title, it says 'BY OUR BUSINESS BUREAU' and 'November 15, 2012'. There are icons for 'Print' and 'Send to Friend'. The article text begins with 'DUBAI: Trinity Holdings, a leading provider of engineering solutions in the Middle East, showcased its new products and services for the upstream oil and gas industry at Abu Dhabi International Petroleum Exhibition and Conference (Adipec), held from Nov.11 to 14, 2012.' A key highlight is mentioned: 'A key highlight of Trinity's showcase at Adipec was TRIBOX, a specialised heat treatment process suitable for oil field components that operate for an extended period of time in corrosive environments.' The text continues: 'The process, which is equivalent to quench, polish, quench (QPQ), provides corrosion resistance, hardness and a black finish, which retains a thin layer of oil on the surface of these components. Premium gas tight connections (VACT) for both onshore and offshore applications and American Petroleum Institute (API) licensed products were also among other products on display.' A quote follows: '"Trinity is focused on extending its engineering portfolio to offer integrated solutions for diverse industry requirements. We are confident that by leveraging over three decades of local experience and partnering with global experts, Trinity will be able to address the challenges posed by the dynamic oil and gas industry," said Arif Sayani, Managing Director, Trinity Holdings.' On the right side of the article, there is a 'Related Stories' section with two items: 'HSBC set to acquire Lloyds' UAE assets' and 'UAE's IT services market expands by 11% to reach over \$1.29b'. Below this is a 'FRONTPAGE' section with a thumbnail image of a newspaper cover and a 'GALLERY' section with another thumbnail image.

Customised solution for oil industry

UAE-based Trinity Holdings has signed a co-operation agreement with US-based Integrated Equipment to repair, service and distribute Pressure Control Equipment for the upstream oil and gas sector in the Middle East.

A MoU was signed and the agreement framework will allow Trinity Holdings to combine its engineering capabilities and local knowledge with Integrated Equipment's API licensed manufacturing (OEM) and global repair service expertise in offering customized solutions for specific requirements of the industry.

The new joint venture, Trinity Integrated Equipment, will pursue repair and re-certification of oil and gas equipment and products including Blowout Preventers (BOPs) (API 16A), Pulsation Dampeners (ASME), Wellhead Equipment (API 6A) and Accumulators (API 16D). Local distribution of Integrated Equipment's API Monogrammed BOPs, BOP spare parts, Gate Valves, Choke & Kill Manifolds (API 16C), various Wellhead and X-mas Tree components and a full range of associated Elastomeric products are also within the scope of the joint operation.

UAE-based Trinity Holdings, has signed a co-operation agreement with Integrated Equipment, a USA-based original equipment manufacturer (OEM), to repair, service and distribute Pressure Control Equipment for the upstream oil and gas sector in the Middle East.

A Memorandum of Understanding (MOU) was signed in this regard by Jagdish Shah, Chairman, Trinity Holdings, and Ash Sharma, President, Integrated Equipment, Inc. recently in Dubai. The agreement framework will allow Trinity Holdings to combine its engineering capabilities and local knowledge with Integrated Equipment's manufacturing and global repair service expertise in offering customised solutions for specific requirements of the industry.

Trinity Integrated Equipment, Trinity's joint venture with Integrated Equipment, will pursue repair and re-certification of oil and gas equipment and products including Blowout Preventers (BOPs), Pulsation Dampeners, Wellhead Equipment and

Accumulators, Local distribution of Integrated Equipment's API Monogrammed BOPs, BOP spare parts, Gate Valves, Choke & Kill Manifolds, various Wellhead and Xmas Tree components and a full range of associated Elastomeric products are also within the scope of joint operation. These products and equipment are certified under American Petroleum Institute (API) and American Society of Mechanical

development of national and regional economy.

"Integrated Equipment strives to broaden and strengthen its existing operation by establishing lasting and mutually beneficial associations worldwide. We are confident that working together will bring optimal solutions to the most challenging opportunities in the region," said Sharma.

For more than 30 years, Trinity Holdings has played a leading role in providing engineering solutions

“This agreement will complement and accelerate our successful service”

Engineers (ASME).

Commenting on the MOU, Arif Sayani, managing director, Trinity Holdings, said: "We are pleased to co-operate with Integrated Equipment to offer our customers an excellent single source for various needs of the oil & gas industry. This agreement will complement and accelerate our already successful service offerings, while contributing to the responsible

to various industry requirements through its manufacturing and service offering. Equipped with conventional and CNC machines, foundry, heat treatment and thermal spray facilities, in-situ services, a large overhauling and fitting section among other state-of-the-art facilities and equipment, Trinity is well poised to cater to the rising demands of the region's oil and gas industry.
